SAN MARINO (half day)

Guided tour of San Marino to discover the most important monuments of the historical centre. Legend tells that San Marino was founded in 301 A.C. by a stonecutter of Dalmatian origin called Marino who had escaped persecutions inflicted on the Christians by the Emperor Diocleziano and who had found refuge on the roughness of Mount Titan.

In crossing the border, which symbolically separates the Italian territory from that of the small State, a large sign welcomes the visitor to the "ancient land of liberty". Thus begins the trip, not only touristic, into the legend of a country which has been able to safeguard its thousands of years of history. As one climbs towards the capital city, what strikes the visitor's attention is the original form of mount titan which reaches its highest point in the proximity of the second tower (756 m). Its elegant and imposing skyline is overlooked by the three mediaeval castles: the Rocca, the Cesta and the Montale, the view which can be admired from their glasses is of incomparable beauty and extends from the soft profiles of the Tuscan-Romagna Appennine mountains to the Adriatic coast. Perched on Mount Titan is the citadel which, from a primitive mediaeval core, developed within the walls built in defence of the small community. The small city centre, with its districts and ancient stone buildings, the innumerable picturesque corners, the squares and the caves - splendid natural scenarios of important events is visited by millions of visitors.

Rate per person € 25,00 inclusive of: transfer by coach, hostess, tour guide of the city (1 hour), free time for shopping.

Entrance tickets to the monuments are not included.

The rate is valid for a group of minimum 30 people.
